

Engr. Bayo Adenrele is the Manager, Front End Development (FED) & Technical Interface at Nigeria LNG Ltd (NLNG) accountable for leading the integrated translation of the ECOP frame of an opportunity, maturing it into a robustly shaped and competitively valuable technical project.

Before his appointment as FED Manager, Bayo was Project Manager coordinating on behalf of NLNG the biggest singular Corporate Social Responsibility and critical National Infrastructure multi billion Naira project embarked upon by the Company and a unique private public partnership in the Niger Delta. A seasoned and highly-efficient professional with 24 years of experience in the oil and gas industry, he has developed expertise in project, reliability, asset and maintenance management. In the past 20 years working in NLNG, Bayo has worked across all areas of the Company from Project Engineering, Project Services, Reliability Engineering and an international assignment as a Senior Consultant in Asset and Operations Management

Prior to joining NLNG, his working career had spanned, Facilities Engineering, and Operations in a Major IOC in Nigeria where he held roles in Corrosion Management and Operations Technical support.

He has a degree in Metallurgical and Materials Engineering from Obafemi Awolowo University Ile Ife and holds an MBA from the University of Nottingham UK.

Bayo is a fellow of Nigeria Society of Engineering (FNSE), COREN registered, an active member of Project Management Institute (PMI) and a founding member of PMI's Africa Working Group.

He strongly believes in mentoring the next generation. His
