

Babatunde is an impact-oriented Software Engineer & Project Manager passionate about emerging technologies, particularly Extended Reality (AR/VR/MR/XR/Metaverse). He currently leads the XR team at PwC Experience centre Nigeria.

He is also the creator and host of XRAtlas Podcast, a podcast that focuses on exploring XR, AI and Metaverse technologies, to better understand how these technologies are shaping the collective future of the human race. Episodes focus on conversing with enthusiasts, developers, designers, brands and leaders in the XR & AI industries, to understand their unique and diverse points of view.

Babatunde is passionate about facilitating the adoption of XR, AI & Metaverse-related technologies in Africa for technological and economic advancement, he believes we have many worlds to change, the Real, the Virtual & Augmented worlds, and that all realities are ours to explore! He believes we should do so with humanity at heart and an unbreakable will!!!
